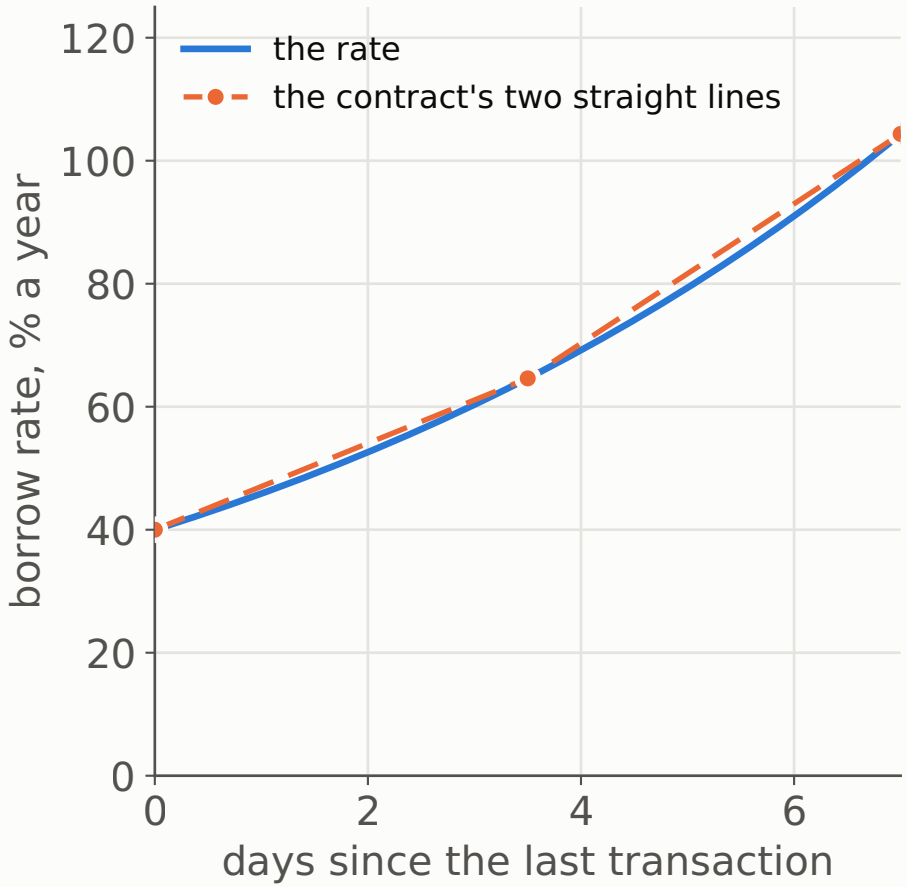
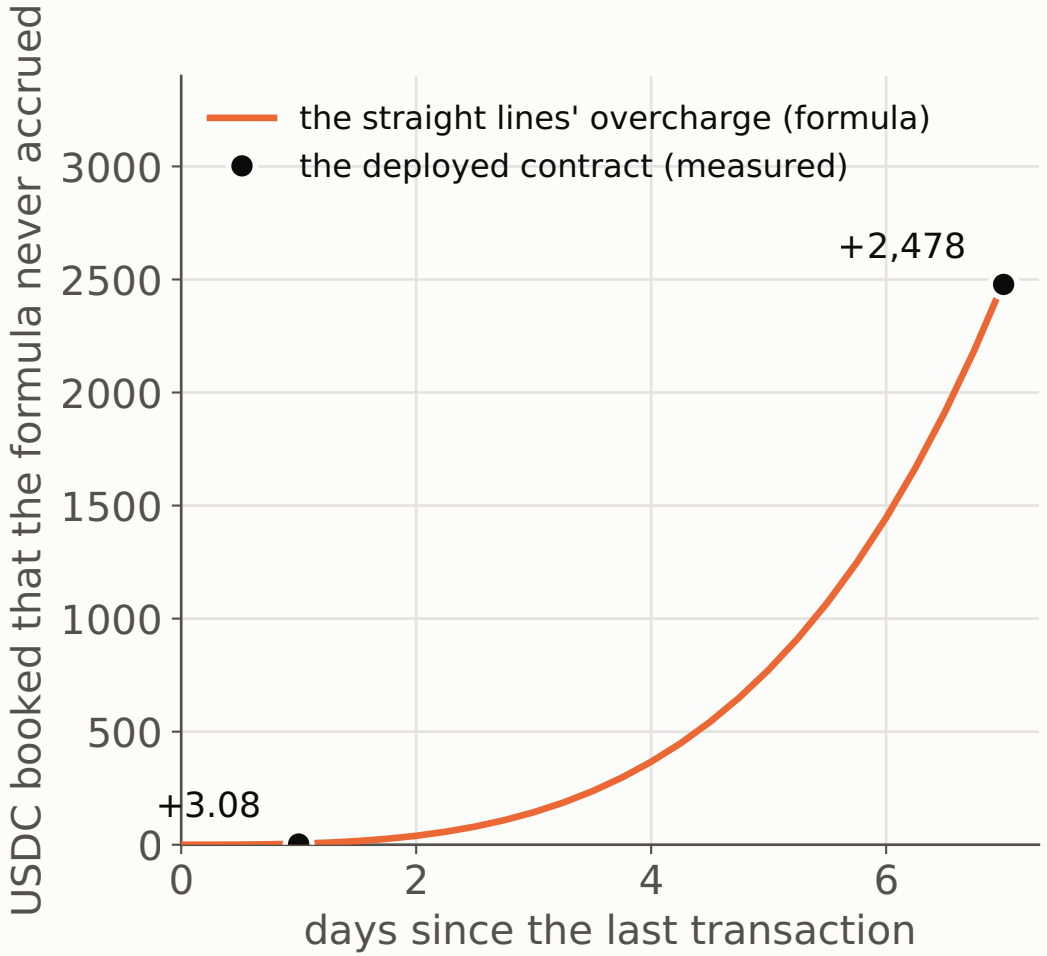
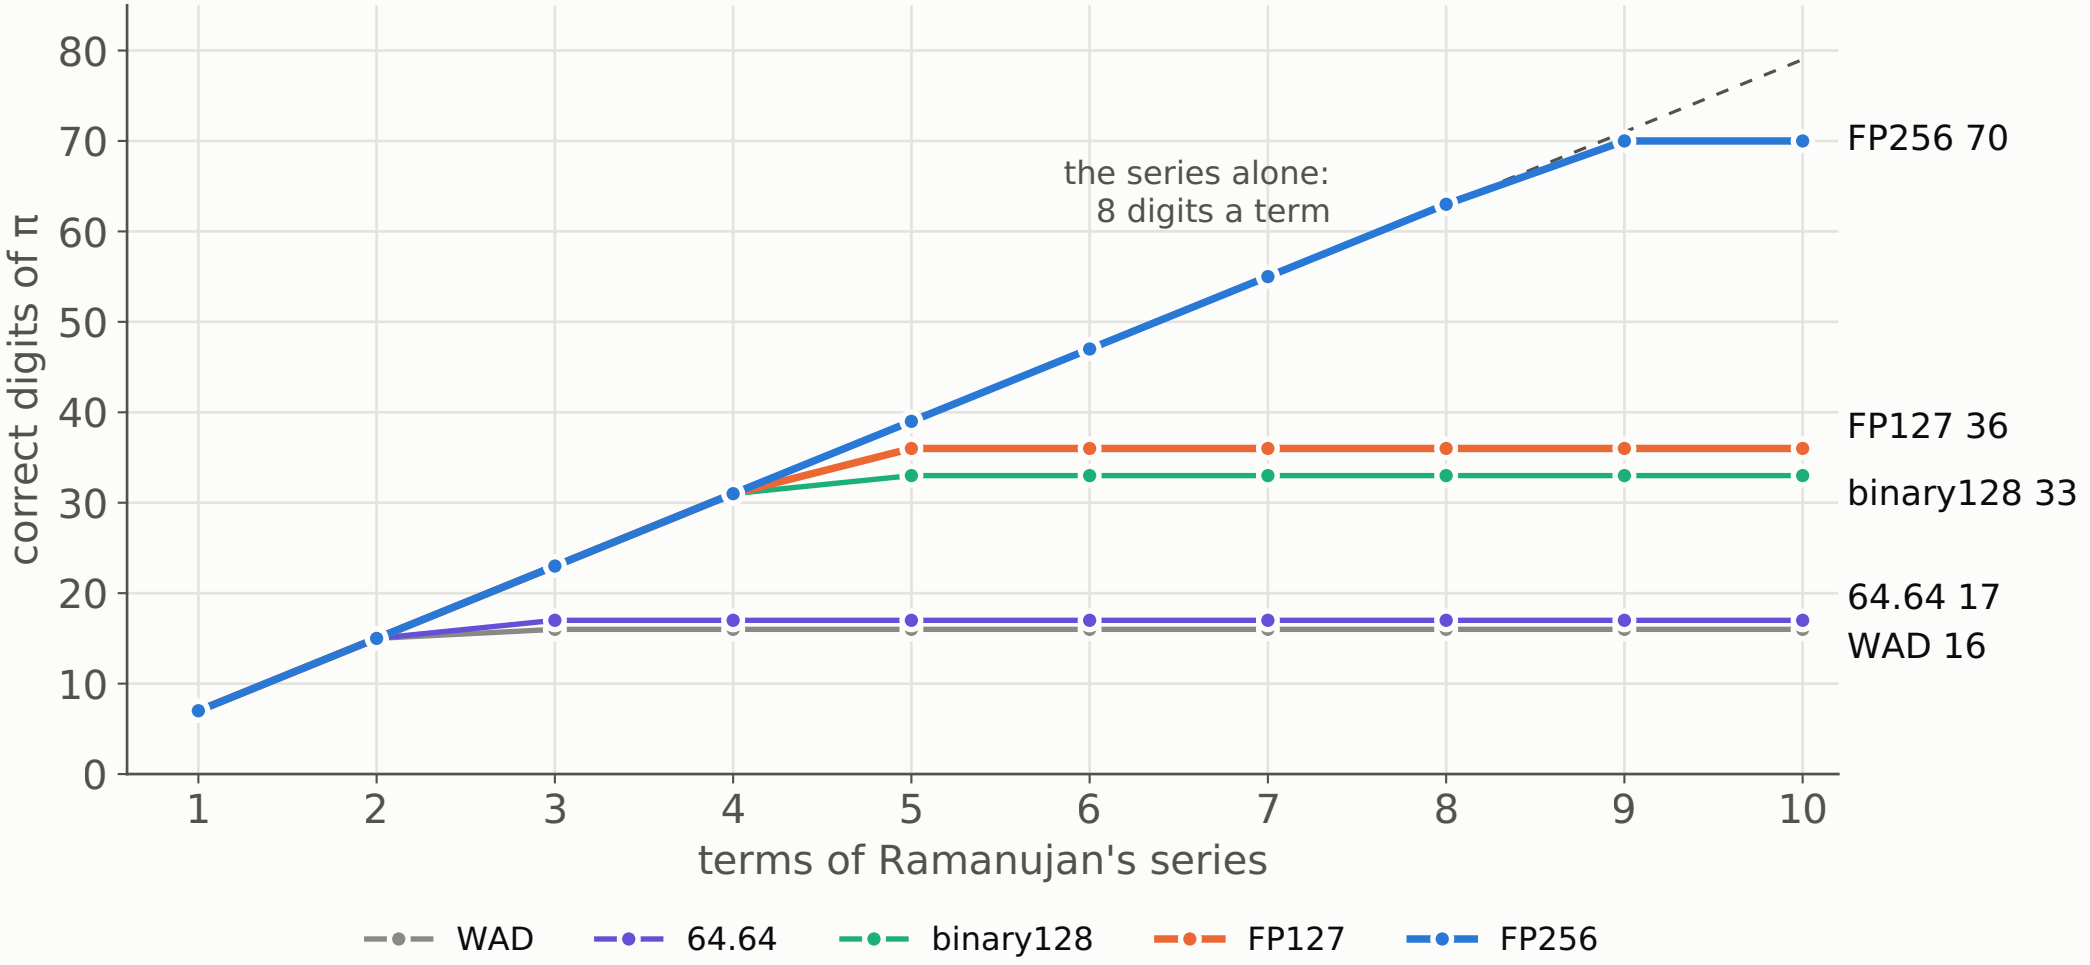
Ten million dollars, untouched for a week





10M USDC borrowed, utilization 100%, target rate 10%. Measured: the rate model and market as deployed (byte-equal to mainnet) vs the stated formula at 200 digits. docs/benchmarks/accrual-deployed.md

The series never stops. The ruler does.



Ramanujan's series through each library's own sqrt, mul and div. docs/benchmarks/pi.md
